EDUCATION

University of Illinois at Urbana-Champaign — Champaign, USA
Doctor of Philosophy in Computer Science — *Aug 2023 - Present*

- Advisor: *Prof. Derek Hoiem*

Master of Science in Computer Science (thesis) — *Aug 2022 - May 2023*

- Advisor: *Prof. Derek Hoiem, Prof. Shenlong Wang*

Bachelor of Science in Computer Science & Statistics — *Jan 2020 - Dec 2021*

- Highest Honors at graduation, Dean's list for all years, GPA: 4.0/4.0

Sun Yat-sen University — Guangzhou, China
Bachelor of Science in Mathematics — *Sep 2016 - Dec 2019*

RESEARCH EXPERIENCE

University of Illinois at Urbana-Champaign — Champaign, USA

SceneDiff: Geometric-Semantic Consistency for Multiview Change Detection — *Jan 2025 - May 2025*
Advisor: Prof. Derek Hoiem, Prof. Shenlong Wang - **Under Review**

- Project targeted the problem of identifying regions that have changed between a pair of captures (images or videos) of the same scene at different times.
- Proposed a dataset and a new method for object change detection between a pair of captures (images or videos) of the same scene at different times.

Region-based Representations Revisited — *Sep 2023 - Nov 2023*
Advisor: Prof. Derek Hoiem - **CVPR 2024**

- Project targeted at investigating new representation by combining SAM regions and dense features to solve various vision tasks, including semantic segmentation, object retrieval, video classification, and scene segmentation
- Responsible for implementation of feature extraction and pooling pipelines, and scene segmentation application on ScanNet

Improving Neural Radiance Fields with Patch-based Monocular Guidance — *Jan 2023 - May 2023*
Advisor: Prof. Derek Hoiem, Prof. Shenlong Wang - **3DV 2025**

- Project aimed to create 3D models that provide accurate geometry and view synthesis, partially closing the large geometric performance gap between NeRF and traditional MVS methods
- Proposed appearance regularization of normalized cross-correlation (NCC) and structural similarity (SSIM) between randomly sampled novel and training view to improve general performance

Plenoptic PNG: Real-Time Neural Radiance Fields in 150 KB — *Aug 2022 - Dec 2023*
Advisor: Prof. Derek Hoiem, Prof. Shenlong Wang - **3DV 2025**

- Project presented Quantized Fourier Features, which encoded a 3D scene into an extremely compact representation from 2D images and enabled its transmittance, decoding, and rendering in real-time across various platforms.
- Assisted in blending Quantized Fourier Features into different network setups, running experiments, and writing the paper.

Sparse SPN: Depth Completion from Sparse Keypoints — *Sep 2021 - Nov 2022*
Advisor: Prof. Derek Hoiem

- Project draw attention to single view depth completion taking point cloud from SFM as input
- Proposed a novel method that outperforms existing depth completion pipelines given sparse keypoint depth, and reconstructed complete point clouds given SfM setup

GRIT: General Robust Image Task Benchmark   *Jun 2021 - Aug 2021*
Advisor: Prof. Derek Hoiem

- Rendered surface normal of object-centric and scene-centric datasets, and split them into training, validation, and testing sets
- Trained a baseline network with training sets, and compare it with several other pretrained state-of-the-art normal estimation networks with testing sets
- Challenge Organizer of the 2nd workshop on Open World Vision of CVPR 2022

University of California San Diego   Remote

Lighting completion from sparse lighting samples   *Jun 2022 - Sep 2022*
Advisor: Prof. Manmohan Chandraker

- Project aims at recovering per-pixel spatially-varying lighting maps taking single color image and sparse lighting samples
- Investigated 2D lighting completion methods with differentiable rendering and compare to pure RGB-based estimation networks

Industry Experience

Research Scientist Internship   Redmond, USA
Meta   *May 2025 - Aug 2025*

Service

Conference Reviewer   Champaign, USA
CVPR, ECCV, WACV   *2024 - 2025*

Teaching Assistant   Champaign, USA
University of Illinois at Urbana-Champaign   *Aug 2022 - May 2023*

- Course: *CS 445 Computational Photography, CS 441 Applied Machine Learning*

Skills

- **Programming Languages**: Python, C/C++, JavaScript, R

- **Other Tools**: Git, Pytorch, Latex
